

Estimator - Building Products

About the Job

CPI DAYLIGHTING INC, a Place for Great People

Headquartered in Lake Forest, IL, **CPI Daylighting** is a leader in daylighting solutions nationwide. We design, manufacturer and install quality daylighting systems including skylights, wall lights and canopies. From universities, schools and athletic facilities, to airports and corporate headquarters, hotels, hospitals and shopping malls, CPI Daylighting has built a legacy of innovative, quality daylighting systems.

The Position:

Basic Function:

Provide in-depth estimates from architectural drawings, on-line plans, preliminary project design documents, and Reps take-offs for the overall CPI line of custom skylights, vertical wall panel, translucent polycarbonate, glass and dynamic intelligent daylighting products.

Specific Department Duties:

- Manage, coordinate and estimate projects during the hard bid, budgetary and preliminary design stage for both materials only and installed jobs.
- Advice architects, designers, CPI sales representatives, customers, and general contractors.
- Study specifications, determine optimal product for requirements and properly apply this knowledge to the estimate.
- Work within a team environment of management, sales, and engineering.

The Candidate The *ideal* candidate will have the following qualifications:

- 3 to 7 years' experience as an estimator in the Architectural Custom Skylights, Curtain Wall, Metal Structures, Glazing, Ornamental Metal, Metal Panels or Building Envelope products.
- Structural engineers and project managers in such industries may be also considered.
- Good communication, negotiation and bid closing skills.
- Basic understanding of field installation principles.
- Four year college degree or a minimum two year technical degree is preferred

Compensation: Based on experience

Training: In-house training and on-going support will be provided.
